FOR IMMEDIATE RELEASE

November 15, 2010

Watkins IT is a full-service IT consulting firm, implementing innovative solutions that empower aspiring businesses to succeed. Since 1996, Watkins IT has been a leading provider of technology services and solutions in the DC metropolitan area. We utilize our broad knowledge to simplify technology and solve our clients' real-life business problems.

Today, business users are often inundated with complex data in different formats from many systems. In the consumer world, while using applications like Google and iTunes, users expect simple, intuitive, and fast ways to find answers when they want them. Unfortunately, it's rarely that simple in the business world. At Watkins IT, we use our expertise and Business Intelligence (BI) tools to bring the same consumer experience to our customers in the workplace. Our BI dashboards enable them to analyze real data and quickly make meaningful decisions.
